SYSTEM REQUIREMENTS

- Installed networking adapter

Isn't it great to have your own home network? An ideal situation, but it is often hard to realize. You have to drill holes, draw cabling in place you do not want to see and you have to find a solution for the only existing network point in your house. A network that has offered reliable services for many years, never let you down and probably has never been switched off.

This is not what you want. Eminent offers a completely different approach to your own home network. The Powerline Mini adapters do not require any additional cabling and can be connected to the mains! that you can start right away. Use the extension kit to connect even more computers to your network.

Read on, because the best is yet to come! The Powerline Mini adapters can be combined with every wired or wireless network. With the Eminent Powerline Mini adapters you can position your wireless router wherever you have the best reach. Great if you like to use a wireless notebook!

If you like to share your broadband Internet connection with several users at the same time, then you need to have a (wireless) router. Connect an Powerline Mini to this router. Connect an Powerline Mini to every pc that needs to be connected. You easily connect the Powerline Mini to your pc's network adapter with the enclosed UTP cable. Could it be easier?

The Powerline Mini can also be used with Apple Mac, Linux, Playstation, XBox and any other device with a network port.

The Powerline Mini is an energy-saving device, and uses only 2 watts of power average. When not using the Powerline Mini, it will switch to power-save mode. In power-save mode, the Powerline Mini device saves you up to 50% power!

BOX CONTENTS
